

1.

```
public class PrintNumbers {  
    public static void main(String[] args) {  
        for (int i = 1; i <= 100; i++) {  
            System.out.println(i);  
        }  
    }  
}
```

2.

```
public class PrintNumbers {  
    public static void main(String[] args) {  
        for (int i = 1; i <= 99; i += 2) {  
            System.out.println(i);  
        }  
    }  
}
```

3.

```
public class PrintNumbers {  
    public static void main(String[] args) {  
        for (int i = 0; i <= 100; i += 2) {  
            System.out.println(i);  
        }  
    }  
}
```

4.

```
public class PrintNumbers {  
    public static void main(String[] args) {  
        for (int i = 100; i >= 0; i--) {  
            System.out.println(i);  
        }  
    }  
}
```

5.

```
public class PrintNumbers {  
    public static void main(String[] args) {  
        for (int i = 100; i >= 1; i -= 2) {  
            System.out.println(i);  
        }  
    }  
}
```
